Heterogenous clots

- Failed retrievals most interesting!
- Many different mechanisms possible
- May not be apparent on Angiogram

Impact of Procedural Technique variants

Conclusion

- Different clot types present different challenges.
- Greater understanding can lead to better solutions.
- In-vitro modelling can be a valuable tool, but output is only as good as the input, and clot is a key input.
- A lot left to learn!

 Pooja Khatri,⁸ Blaise Baxter,⁹ Raul Nogueira,¹⁰ Matt Gounis,¹¹ Tudor Jovin,¹²
 David F Kallmes¹

Question	Articles	Cor?	Comments
Histology and etiology	9	No	Conflicting RBC – A-fib, large-artery
Histology and angio outcomes	4	No	
Imaging and histology	8	Yes	HAS -> RBC SVS -> RBC
Imaging and angio outcomes	8	Yes/No	HAS -> better outcomes - 5 positive, 1 no, 1 negative SVS -> better outcomes - 2 positive
Imaging and etiology	7	No	Conflicting. Meta-analysis said no.

Thrombus Migration in the Middle Cerebral Artery: Incidence, Imaging Signs, and Impact on Success of Endovascular Thrombectomy
