Case Presentation

- 58 year old male with history of hypertension and diabetes
- 30th Nov, 3pm: SO (nausea, double vision, unsteady gait, postural instability, dysarthria, NIHSS 4)
- 10:18 pm: CT/CTA (tertiary center)
Case Presentation

- **No iv-tPA due to clinical improvement**, transfer to UKE
- 1st Dec, 00:20am: NIHSS 4
- 00:45am: NIHSS 11 (somnolence, left gaze palsy, left hemiparesis and sensory loss, pos. Babinski sign)
- 1:08 am: CT
- 1:15 am: 81 mg iv-tPA and 75 mg Clopidogrel
Case Presentation

- 1:45am: MRI
Case Presentation

- 3:10am: DSA

Images of blood vessels:
- Right ICA
- Left VA
- Left VA
3:34am: after 1\textsuperscript{st} retrieval with Solitaire 4x20
1:43pm: standard follow-up CT after iv-tPA, NIHSS 4

No Clopidogrel loading dose up to this point?
• 3:15pm: clinical worsening (somnolence, pathological crying, left hemiplegia and sensory loss, spontaneous Babinsky), NIHSS 24
• 3:27pm: CT/CTA
Case Presentation

- 4:23pm: DSA + administration of bolus of Aggrastat (Tirofiban, GpIIb/IIIa Antagonist)
Case Presentation

- 4:31pm: 1st aspiration, no recanalization
- 4:41pm: after 1st retrieval with Solitaire 4x20

Left VA

Left VA
Case Presentation

- 4:42pm: 2nd aspiration, no recanalization
- 4:46pm: 1st PTA, new left P1/P2 occlusion
Case Presentation

- 4:53pm: Stent (Acclino Flex 4.5x35) + PTA
- 5:08pm: after 3rd aspiration
• 2nd Dec, 8:03pm: Follow-up CT/CTA, NIHSS 4, small thalamic hemorrhage
